

Student Name:		Student Number:		
Lab Preparation (Evaluate at or near beginning of lab).				Notes
All parts of lab written, up to part4.s	Little code written	Almost done, but code not complete	Complete part4 program, may have some bugs	
Each file is commented	Few or no comments	Limited comments	Well commented; structure and important state/variables	
Other Notes				
Lab Prep. Grade: /2				Notes
Lab Performance (Evaluate near end of lab)				Notes
Lab Performance Pt I (Functionality) /4				
Count ones and zeroes (part 3) is functional	Not working or multiple bugs	Works, but has a corner case bug	Always gets correct answer	
Show on LEDs (part 4) works	Doesn't display correctly	Correct, but update rate too fast or slow to see well	Displays correctly, changing from zeroes to ones output at a comfortable rate	
Program structure meets specifications	Violates a specification		Meets all specifications: Takes 0-terminated list; subroutine ones takes input in a0 and returns value in a0; same subroutine used to count zeroes and ones in word.	
Other Notes				
Lab Performance Pt 2 (Question Answering) /4				
Can explain code and answer questions on relevant course material	Incorrect or no answer	Answer is mostly correct, but incomplete, unclear or has some minor errors	Answer is clear and organized; shows understanding of program and of the relevant course material	
Other Notes				
Lab Perf. Grade: /8				Notes
Total Grade: /10				

Note: each team member is assigned an individual grade based on the parts of the demo / question answering by that team member.
